## "ECONOMIC OUTLOOK: INDIA AND WORLD: POST COVID ANALYSIS"

Organized by: Kalinga Institute of Industrial Technology (KIIT) Deemed to be University  
Bhubaneswar, Odisha, India

19<sup>th</sup> December 2020 | IST 6:00 p.m

The COVID pandemic has left the world economy in doubt and speculation for future growth. The global economic growth is projected at -4.9% in 2020. In 2021, the overall global economic growth is projected at 5.4%. This would leave 2021 global GDP 6.5 percentage point lower than pre-Covid projection of January 2020. As per the forecast of IMF, the Indian Economy is projected to contract by 10.3% in FY 20-21, the third steepest decline after Spain and Italy and the steepest fall among emerging markets and developing economies.

At this juncture, it is appropriate to have an "INTERNATIONAL WEBINAR" on this issue with distinguished speakers and economists, which will provide a guidance for students, researchers, thinkers and policy makers.
